

## Physics 309 Pre-Lab Exercise 7

Work to be done before the lecture of November 6, 2008

- Download handouts 5, 6, and 7 from the course web page and read them before next class.
- On November 6 and 13, I will review the papers and discuss some of the key criteria of 'scientific writing'. This will be relevant to the formal report you have to hand in at the end of the course.

**NOTE:** the formal reports will have to be handed in **electronically** and will be scanned with a pretty nasty anti-cheating software (so, don't even think of cheating!!!). Check this out:

<http://www.vpacademic.ubc.ca/integrity/turnitin/>

- For people interested in a LATEX example in Nature format, handout 7 is the one.
